

BSG Player Aid 1 · Your Turn

Base + Pegasus + Exodus + Daybreak · Earth objective · Cylon Fleet · Final Five ·
Mutineer · House rules v1.2

YOUR TURN

- 1. Receive Skills:** draw your skill set, however many cards you hold.
Sickbay/Resurrection Ship: 1 card. Infiltrating Leader: +1 (3 total). Revealed Cylon: 2 cards, each from a different deck.
- 2. Move** (or use one Movement ability instead). Changing ship = discard 1 Skill card. Never move voluntarily into a hazardous (striped) location.
- 3. Action:** one action (see list below).
- 4. Crisis:** draw and resolve. **Skip** if you are a revealed Cylon, in the Brig, or anyone used the Demetrius Bridge this turn.
- 5. Activate Cylon ships** shown on the crisis (left to right).
- 6. Prepare for Jump:** jump icon on the crisis = fleet marker +1. Auto Jump space = jump. **Mutineer:** on your turn a jump icon also means draw 1 Mutiny card.
- 7. Discard:** everyone down to 10 Skill cards; President to 10 Quorum cards. Pass the token left.

ACTIONS (CHOOSE ONE)

- Activate your location (not if damaged).
- A Skill, character, Title, Quorum or Mutiny card **Action**.
- Activate the viper you are piloting: move, attack or escort.
- Reveal a *You Are a Cylon* card and use its Action (no Action if revealed in the Brig).
- Infiltrating Leader: return to the Resurrection Ship.
- Do nothing.

MOVING AND PILOTING

- Ships: Galactica, Colonial One, Pegasus, Demetrius, Rebel Basestar (if on your side). Each change costs 1 Skill card.
- **Landing** a viper is a *move*, not an action: discard 1 card, viper to Reserves, go to any ship location. Can also land with a move from *Executive Order / State of Emergency*.
- Piloting: Hangar Deck action launches you in a viper. Viper damaged/destroyed = you go to Sickbay. On a jump pilots return to the Hangar Deck (assault raptor pilots may stay out).
- **Movement abilities** = text starting "Movement:" on Skill cards (e.g. Pegasus *Critical Situation*) or character sheets (e.g. Caprica Six's *Intimate*). Use one **instead of** moving, on your own turn only, max 1 per turn; allowed in the Brig.

SKILL CHECKS

- 1. Read** the card; the chooser (current player, President, Admiral or CAG) decides now.
- 2. Destiny:** 2 cards face down.
- 3. Play:** starting left of the current player, ending with them, each plays once, face down.
- 4. Shuffle** and split into matching and non-matching colours.
- 5. Skill Check Abilities** (icon), then **Consequence** (if any icon card was played), then **Reckless**.
- 6. Total** = matching minus non-matching. At least the difficulty = pass; else partial pass (if printed); else fail.

Who	Max cards into a check
Most players	Any number
In the Brig / revealed Cylon	1
Infiltrating Cylon Leader	2 (1 in the Brig)

Secrecy: say only "a lot"/"a little", "high"/"low". Never name colours, strengths or which cards were yours. The *number* of cards you play is public.

Missions ignore all abilities and cards that modify crises or skill checks, and Skill Check Abilities aren't resolved.

SKILL CARDS

Type	Colour	Good for
Politics	Yellow	Morale; draw outside your set
Leadership	Green	Move others; extra actions
Tactics	Purple	Die bonuses; scouting
Piloting	Red	Rerolls; extra attacks
Engineering	Blue	Repairs; Build Nuke
Treachery	Brown	Negative in checks; mainly Cylons

Destiny deck: 2 of each of the 6 types (12). **Reckless:** one Reckless card per check, played first; then flip Treachery: strength >0 discard, strength 0 flip another and resolve both.

Discarding by choice a Treachery card that says so, or *Dradis Contact / Bait*, draws 1 Mutiny card (max 1 per turn). Random or whole-hand discards don't count.

BRIG AND SICKBAY

- **Brig:** skip your Crisis step; 1 card per check; no moving out except by the **Brig check (7, Politics + Tactics)**, *Presidential Pardon*, *Make a Deal*, *Dishonest Tactics* or *Rebuild Trust*. Everyone can play into your escape check.
- Admiral and CAG lose their title in the Brig; the President keeps hers.
- **Sickbay:** draw 1 card; leave freely on your move.

MUTINY CARDS AND THE MUTINEER

- Use as your Action, then discard.
- **The moment you draw a 2nd Mutiny card, go to the Brig** and keep 1 (unless the effect says otherwise).
- **The Mutineer** (a face-up Loyalty card) is human unless their other card says Cylon. On getting the card: draw another Loyalty card and 1 Mutiny card, and hand over any titles. They draw a Mutiny card on each of their turns with a jump icon, hold up to 2, and go to the Brig on the **3rd** (keeping 2).
- Revealed Cylons never draw or use them; a Leader only while Infiltrating.

TITLES

- **President:** Quorum hand (limit 10); keeps the title in the Brig.
- **Admiral:** chooses destinations; holds nukes (2 at start, max 3).
- **CAG:** places civilian ships when no area is named (an empty area if possible); "CAG Chooses" crises.
- Titles pass by line of succession when the holder is executed, revealed, or (Admiral/CAG) sent to the Brig.

RESOURCES AND DICE

- Resources run 0–15. **Any resource at 0 at the end of a turn = Cylons win** (fine if it is raised back above 0 before the turn ends).
- Ties for "highest/lowest resource": the current player chooses. Die rolls are capped at 1–8 after modifiers.
- When several players want to act at once, the current player sets the order.

BOARD SKILL CHECKS

- **Admiral's Quarters:** 7, Leadership + Tactics → accused goes to the Brig.
- **Brig:** 7, Politics + Tactics → escape to any Galactica location.
- **Airlock (Pegasus):** executes a character as printed on the board; **Treachery counts positive** there.

MIRACLE TOKENS

Spend your token to use your "Once per game" ability. Hold only 1 (alternate Baltar up to 3). Lost when you reveal as a Cylon; none for a replacement character.

BSG Player Aid 2 · Combat, Jumps & Cylons

When the book and a card disagree, the card wins

VIPERS

Command activates unmanned vipers (each can be activated many times). Each activation: **launch** (to a launch-icon area), **move** 1 area (Mark VII: 2; around Galactica, not over), **attack**, or **escort** (shuffle a civilian ship in its area back into the pile). **Mark VII**s start damaged. **Assault raptors** count as vipers, are never just damaged, and may stay out through a jump.

ATTACK TABLE (D8)

Target	Result
Raider	3–8 destroyed
Heavy raider	7–8 destroyed
Viper	5–7 damaged, 8 destroyed
Viper Mark VII	6–7 damaged, 8 destroyed
Assault raptor	7–8 destroyed
Civilian ship	Destroyed automatically
Galactica, by raider / by basestar	8 / 4–8 damaged
Basestar, by viper / assault raptor / Galactica	8 / 7–8 / 5–8 damaged
Nuke (at a space area)	1–2 basestar damaged twice; 3–6 basestar destroyed; 7 basestar + 3 raiders; 8 every ship in the area, yours too

Rolls cap at 1–8. **Nukes**: Admiral's Action; the token goes beside the board afterwards (*Build Nuke* can recover it). **Basestar damage**: 3 hits destroy (Critical Hit counts 2); all damage clears on a jump.

CYLON SHIP ACTIVATION

- **Raiders**: attack a viper (unmanned first) → destroy a civilian ship in the area → move toward the nearest civilian ship → attack Galactica. No raiders: each basestar launches 2. No raiders or basestars: **Cylon Fleet**.
- **Launch raiders**: each basestar launches 3. No basestars: **Cylon Fleet**.
- **Heavy raiders**: centurions on the track advance 1; heavy raiders move toward a launch-icon area and board from there. None: each basestar launches 1. None at all: **Cylon Fleet**.
- **Basestars**: each attacks Galactica or Pegasus. None: **Cylon Fleet**.

Cylon Fleet = place that ship on the Cylon Fleet board (roll d8 for the area) and advance the pursuit marker 1. Out of ships: every ship in the highest-numbered area holding that type jumps in.

CYLON FLEET BOARD

- Areas: 7–8 in front of Galactica, 4 and 2 on the launch side, 5–6 and 3 on the other side, 1 behind.
- Pursuit track civilian-ship spaces: the **CAG places** 1 (or 2) civilian ships.
- **Auto Attack**: every ship on the board jumps to its matching area, then the marker resets.
- On a jump, Cylon ships go back to the matching Cylon Fleet areas; **civilian ships stay put**.

JUMPING

1. Vipers to Reserves, pilots to Hangar Deck (assault raptors may stay). Civilian ships stay.
2. Cylon ships to the Cylon Fleet board; remove basestar damage.
3. Clear the Active Mission (distance mission passed: next to Earth; failed: shuffle back).
4. Admiral draws 2 Destinations, keeps 1, puts the other on the bottom.
5. Resolve it; add its distance. **4+ = Sleeper phase. 10+ = the next jump wins.**
6. Reset the fleet marker.

FTL Control (blue spaces only): roll d8; 6 or less = lose the population shown on the track.

EARTH AND MISSIONS

- **Bridge** (Demetrius): flip a Mission and resolve its check. **No Crisis card that turn**. One mission per jump.
- Pass a distance mission = distance counts immediately. Demetrius and Rebel Basestar locations can't be damaged.
- *Cylon Civil War* brings in the Rebel Basestar: pass = the humans' side, fail = the Cylons' side.

LOYALTY AND THE SLEEPER AGENT PHASE

- Any **"You Are a Cylon"** card = **you are a Cylon**.
- **Final Five** counts as *Not a Cylon*. Its text fires only when someone else looks at it or you are executed. Never say you have one.
- **Sleeper (4 distance)**: everyone except the Leader gets 1 card (Boomer 2); the Leader gets 2 Motives. Revealed Cylons give theirs to a human. If the Mutineer card still hasn't appeared, the current player picks a human to draw 1 more. 30 seconds to read.

REVEALING AS A CYLON

Your Action only. Discard to 3 Skill cards, all Mutiny cards and your miracle token → titles pass → move to the Resurrection Ship → draw 1 Super Crisis → at 6 or less distance, give other Loyalty cards to a human → if you were the Mutineer, give that card to a human → turn ends.

Revealed Cylon turn: draw 2 (different decks), move among Cylon locations, use your location's action only. No crisis or ship activation (Caprica can play one). Ignore negative crisis effects; 1 card per check.

CYLON LEADER

- A known Cylon; the **Motives** decide the side. Wins with a side if ≤1 **Motive unrevealed** and 2+ **revealed Motives** match it.
- Reveal a Motive whenever its condition is currently true (or at game end).
- **Infiltrate** via Human Fleet: counts as human, draws 3, draws a crisis, plays up to 2 cards per check; can never hold a title.

EXECUTION

Discard Skill and Mutiny cards and miracle token → prove loyalty. **Human**: –1 morale, character gone, discard Loyalty cards, pick any new character, add 1 Not-a-Cylon card to the deck and draw 1 (an executed human Mutineer stays the Mutineer). **Cylon**: reveal 1 Cylon card, give the rest to a human, go to the Resurrection Ship (no Super Crisis). Your turn ends.

GAME END

Cylons win immediately if...	Humans win when...
A resource is at 0 at the end of any turn · a centurion reaches the end of the track · 6 Galactica locations damaged at once · no characters left after an execution	The fleet jumps after reaching 10+ distance (don't draw a Destination)
